NOTICE

May 7, 2026

We regret to notify you that our parent company, Osada Electric Co., Ltd. (Japan), who is our sole supplier of Osada products, has decided to close our office in the U.S. because they are making changes in their business strategy.

This is beyond our control. Our last day of business will be June 19, 2026. All transactions going forward will be by Mastercard or Visa only. Supplies and parts for repairs are limited. We are currently setting limits on some popular items to allow customers to purchase what they need. Beginning June 1st, everything must go and some items may be discounted in price. It will be first come, first served while supplies last. Repairs should be sent to arrive in advance of June 19, 2026, in order for the repairs to be done and shipped back to the customer. Any repairs received after June 19, 2026, will be returned to sender.

From July 1, 2026, Osada Electric Co., Ltd. (Japan), the manufacturer, will directly handle support, warranties, and repairs. A link to the contact form/URL will be posted on this website by June 30, 2026, as well as a list of models eligible for repair services in Japan.

With our sincere appreciation for your patronage over the years,

Osada, Inc.
